## AAI - Nordian ATPL (A) Course(for DGCA)

Your partner for a glorious career in the sky, providing the best infrastructure in terms of Aircraft, Instructors, Technology and Environment

## The AAI - Nordian ATPL (A) Course (for DGCA)

Aviation Academy International(AAI) believes in making quality education available at the fingertips of every professional aviator. We, at AAI, recognize the large gap in the demand for good ATPL ground training and the lack of such in the Indian market. AAI in collaboration with Nordian has entered the field to bring quality distance learning through an e-learning platform.

Nordian is an e-learning solution provider supporting KLM Academy, Manchester University, London Metropolitan University and many other aviation institutions in Europe. Nordian has the experience and is the market leader in conducting the JAA FCL-A program. After careful study and analysis, and using the Nordian platform, AAI has designed, structured, and created a course to meet the current needs of the DGCA - ATPL(A) syllabus. This web-based e-learning system along with books, CBT lessons, study guides, and online tests is ideally suited to the "on the move community" of professional Indian aviators.

Study and learn on the move, set your own pace at your own schedule without taking a break from work - works great for professional pilots during these turbulent times the industry is passing through.

### Key Features

E-learning Course	Includes study guide, CBT lessons, self assessment, progress, and school tests
