AAI Licence Conversion Course

Your partner for a glorious career in the sky, providing the best infrastructure in terms of Aircraft, Instructors, Technology and Environment

The AAI - License Conversion Course

To crack an exam one needs to understand the needs of the system and evaluate the training need. We, at AAI, have studied the FAA and JAA systems of CPL and ATPL training. Our own students train for abroad for CPL. We need them to be successful in the Licence Conversion Examination of the DGCA. Keeping this in mind, we put in our experience and expertise in designing this course for our students.

Due to repeated requests for such training we have thrown open this course to students from other Flying Schools. Four domain experts with proven reputation with over 25 years of practical and teaching experience conduct this course. AAI has a laboratory, library, classrooms with modern training aids, and PC based Flight Simulator for training.
